

## Calculators

Candidates are permitted to bring in scientific calculators that are non-programmable and non-graphing without memory storage. Candidates are not to bring any external devices (peripherals) to support calculators, such as manuals, printed or electronic cards, printers, memory expansion chips or cards. Loose batteries (no packaging) are permitted in the examination room.

Candidates are advised that calculators will be inspected by proctors prior to the start of the examination. The calculator must then remain in full view on the candidate's desk for proctors to continue to inspect periodically throughout the duration of the examination.

The use of programmable calculators is not permitted. The only equipment allowed is that which has been authorized by both the Measure Learning and ASET. If a candidate attempts to bring a non-approved calculator into the exam room, the candidate must forfeit the calculator to the proctor for the duration of the examination and retrieve this upon completion of the exam.

The term "programmable" includes any calculator that can store a sequence of keystrokes that can be retrieved after the calculator is turned off or powers itself off.

Calculators with any of the following mathematical features are prohibited:

- i. graph plotting
- ii. equation solving
- iii. symbolic algebraic manipulation
- iv. numerical integration
- v. numerical differentiation
- vi. matrix calculations

Calculators with any of the following general features are prohibited:

- i. data banks
- ii. dictionaries
- iii. language translators
- iv. text retrieval
- v. capability of remote communication
- vi. multi-line playback or calculator history
- vii. formula memory, definable memory or CALC memory

The list provided below identifies a sample set of calculators permitted or not permitted for the examination. This is not an exhaustive list as all scientific calculators must be checked and approved prior to the examination. Please email ASET at [registration@aset.ab.ca](mailto:registration@aset.ab.ca) with the model number and brand of calculator for pre-approval prior to the examination date scheduled.

**It is the candidate's responsibility to ensure that the calculator they are intending to bring for the examination is permitted.**
